

Crash sensor(Left)

Introduction

A miniature snap-action switch, also trademarked and frequently known as a micro switch, is an electric switch that is actuated by very little physical force. Micro switches are very widely used; among their applications are appliances, machinery, industrial controls, vehicles, and many other places for control of electrical circuits. They are usually rated to carry current in control circuits only, although some switches can be directly used to control small motors, solenoids, lamps, or other devices.

This is a small micro switch sensor designed for the Arduino. It could be directly connected to the IO Expansion shield. It integrates the pull-up resistor and the status indicator LED onboard. That makes it easier for testing. The miniature snap-action micro switch with roller lever make it suitable for more different environment application.

Common Applications

- Levelling and safety switches in elevators
- Door interlock on a microwave oven
- Vending machines
- Detect paper jams or other faults in photocopiers
- 3D Printer position feedback, etc...

Specification

Working Voltage: 5v

Pinout

- 1 Digital output
- 2 VCC
- 3 GND

Onboard status indicator LED

Directly connected to the IO Expansion shield For Arduino

M3 mounting hole x2

Size: 30x20x8mm

Shipping List

Crash sensor 1 unit

SUCONEL
SUMINISTROS Y CONTROLES ELECTRÓNICOS S.A.

Cra 53 # 50-51 Locales 207-208 Pbx: (4)448 78 30
